HealthPartners, Inc.

Primary Care Payer Action Collaborative

PAC

The Primary Care Payer Action Collaborative (PAC) serves as a “national table” driven by payers committed to improving primary care by:

- Identifying and committing to collective goals
- Sharing learning to accelerate action
- Tackling operational barriers to successful APM implementation with an initial focus on the CPC+ model

The Role of the PAC

The Intersection of the PAC and CPC+

CPC+

Multi-payer primary care APM designed to support practice-level transformation in 14 regions by encouraging regional payers to align alternative payment model, data sharing, and quality measure approaches

SHARED MILESTONES

Seeking solutions that enable better care to multi-payer primary care APM implementation challenges, such as:

- Aggregating multi-payer data
- Aligning quality measures
 - APM payment issues
 - TCOC Issues

PAC

Establishes a national table for regional payers to collaboratively identify and implement solutions, share promising practices, and accelerate progress towards the successful implementation of multi-payer primary care APMs, such as CPC+, resulting in better care to patients and smarter spending

Strengthening collaboration and empowering participants to take action to advance APM adoption as part of improving primary care delivery and outcomes

Audience Discussion

- Most important and tangible benefit of primary care payment reform that you've seen?
- Top obstacles to payment reform for primary care, and strategies for getting beyond these obstacles?
- What issues should be top of mind as we launch the PAC?
- How and when would you like to be engaged in this effort?

Joining the Discussion:

Glenn Madrid, MD,
FAAFP

Family Physician,
Primary Care Partners

Leonardo Cuello

Health Policy
Director, NHeLP

Reid B. Blackwelder,
MD, FAFAP

Professor and Interim Chair,
Family Medicine, *Quillen
College of Medicine, ETSU*

Past President,
*American Academy of Family
Physicians*

Rachel Quinn

Special Assistant for
Health Care Policy
and Programs,
Washington Health
Care Authority
