

Breakout Session: Accelerating Change in the QIN-QIO Service Areas

Monday, April 25, 2016

9:45am – 11:00 AM

Health Services Advisory Group – Kim Salamone

- **True Transformation is a Paradigm Shift**
 - Requires more than EHR quality reporting, workflow changes, and documentation
- **How to identify practices ready?**
 - Leadership involvement in TCPI assessment process
 - Attitude is everything
 - Comfortable with the concept of change is critical
 - Leadership acknowledges the *overlying concepts* of the transformation
 - Openness in the discussion of the practice representatives
 - Little, if any, '3's on the baseline assessment because the acknowledgement to have 'room for improvement' is repeated throughout the assessment
